**TRADE NAMES:**

**DOSAGE:**

- **Dosing: Adult**
  
  **Ocular inflammation/infection:** Ophthalmic:
  
  Suspension: Instill 1-2 drops into the conjunctival sac of the affected eye(s) 4-6 times/day; in severe disease, drops may be used hourly and tapered to discontinuation
  
  Ointment: Place ~1/2” ribbon in the conjunctival sac of the affected eye(s) 3-4 times/day or apply at bedtime as an adjunct with suspension
  
  **Note:** If signs and symptoms do not improve after 2 days of treatment, the patient should be re-evaluated

- **Dosing: Geriatric**
  
  Refer to adult dosing.

- **Dosing: Renal Impairment**
  
  No dosage adjustment provided in manufacturer’s labeling. However, dosage adjustment unlikely due to insignificant systemic absorption.

- **Dosing: Hepatic Impairment**
  
  No dosage adjustment provided in manufacturer’s labeling. However, dosage adjustment unlikely due to insignificant systemic absorption.
