**Paracetamol [Acetaminophen]**

### Standard Dilution

<table>
<thead>
<tr>
<th>[Prescribed dose]</th>
<th>[Conc: 10 mg/ml]</th>
<th>[Administered undiluted over 15 minutes]</th>
</tr>
</thead>
</table>

Injectable solution may be administered directly from the vial without further dilution.

Doses <1000 mg (<50 kg): Withdraw appropriate dose from vial and transfer to a separate sterile container (e.g., glass bottle, plastic I.V. container, syringe) for administration. Small volume pediatric doses (up to 600 mg [60 mL]) may be placed in a syringe and infused over 15 minutes via syringe pump.

Doses of 1000 mg (≥50 kg): Insert vented I.V. set through vial stopper.

### Stability / Miscellaneous

Injection: Store intact vials at 20°C to 25°C (68°F to 77°F); do not refrigerate or freeze. Use within 6 hours of opening vial or transferring to another container. Discard any unused portion; single use vials only.
