

Connect to "JUST WLAN" Wi-Fi

These instructions are for JUST staff, faculty, and students who need to connect to JUST WLAN wireless network. Your JUST affiliation and device type will determine your connection method.

Windows10 OS

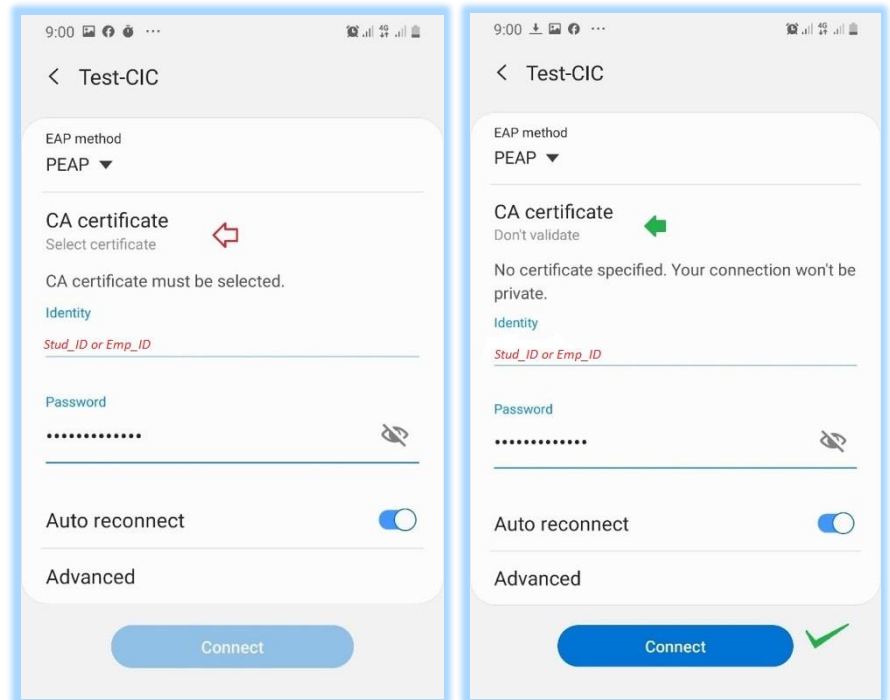

- Connect your computer to JUST WLAN wireless network
- Insert your JUST identity and password
- A warning message will appear as shown on the right, then choose "Connect":

Note: Old versions of Windows still need to manually configure the WIFI settings

Android OS

- All android OS devices that are below **Version 8.1** can be connected directly after inserting JUST identity and password
- Android devices with Version 8.1 and above need to set **"CA Certificate"** to **"Don't validate"**. Then, the "Connect" button will be available as shown on the right:

IOS devices

- Connect directly after inserting JUST identity and password, click on **"Trust"** as shown on the right.
- **The warning message on the right may appear for the already connected users. Accept it by proceeding with the action mentioned above.**
