COURSE DESCRIPTION:

Students will begin identifying and accumulating the specialized knowledge, skills and resources needed for veterinary Herd Production Medicine (HPM) in their species of interest. Industry and academic professionals will make presentations in their areas of expertise.

OBJECTIVES OF THE COURSE:

At the end of the course, each student will be able to:

- Orient students to HPM
- Acquaint students with HPM resource materials.
- Acquaint students with the diverse opportunities available in HPM.
- Enable students to begin identifying and acquiring the skills for providing HPM services to clients in animal agriculture.

Weeks	Topic
1-2	<ul style="list-style-type: none"> • Introduction to Herd Production Medicine <ul style="list-style-type: none"> ▪ What is veterinary production medicine? ▪ What specialized skills and knowledge are required? ▪ What are the basic differences between production and traditional veterinary medicine?
3	<ul style="list-style-type: none"> • Record systems and herd monitoring in production-oriented health management programs in food-producing animals <ul style="list-style-type: none"> ○ Why keep record ○ What kinds of records need to be kept ○ What steps need to be taken to set up a record system

	<ul style="list-style-type: none"> ○ What kinds of records are there ○ Dairy records analysis and evaluation of performance
4	<ul style="list-style-type: none"> ● Health management of dairy calves and replacement heifers <ul style="list-style-type: none"> ○ Causes of economic loss in dairy calves ○ Epidemiology of dairy calf disease ○ Risk factors for dairy calf disease ○ Environmental, housing, and management practices ○ Principles of control and prevention of infectious diseases of dairy calves ○ Calf nutrition from calf to weaning ○ Objectives of raising herd replacements ○ Components of heifer health management programs
5-6	<ul style="list-style-type: none"> ● Mastitis control in dairy herds <ul style="list-style-type: none"> ○ Definition and terminology ○ Why mastitis control should be part of health program ○ Epidemiology of mastitis ○ Screening tests for detecting mastitis ○ Mastitis classification <ul style="list-style-type: none"> ▪ Contagious ▪ Environmental
7-9	<ul style="list-style-type: none"> ● Dairy cattle nutrition <ul style="list-style-type: none"> ○ Levels of nutritional services ○ Digestive physiology of dairy cow ○ Factors affecting nutrient requirements ○ Nutrient requirement of dairy cows ○ Feeds for the dairy cow ○ Feeding systems for dairy herds ○ Balancing ration ○ Monitoring dairy feeding programs ○ Metabolic diseases and nutrition
10-11	<ul style="list-style-type: none"> ● Housing and environment for dairy cattle <ul style="list-style-type: none"> ○ Planning for management ○ Animal environment and ventilation ○ Animal lying spaces ○ Housing systems ○ Calf and heifer housing ○ Sorting, handling, and restraint for treatment ○ Manure management

	<ul style="list-style-type: none"> ○ Lameness in dairy cattle ○ Internal parasitism ○ Behavior problems with direct economic impact
12	<ul style="list-style-type: none"> ● Lameness in Dairy cattle <ul style="list-style-type: none"> ○ Noninfectious disorders of bovine foot ○ Infectious disorders of foot skin ○ Capture of lameness data for analysis and interpretation of foot health ○ Use of information on lameness
13	<ul style="list-style-type: none"> ● Health and production management in sheep flocks <ul style="list-style-type: none"> ○ Causes of economic losses in sheep flocks ○ Types of flock health programs ○ Targets of performance in sheep flocks ○ Management of ewe flocks ○ Nutrition of ewes during gestation and early lactation ○ Optimize perinatal survival of lambs
