

BRONCHICUM N

Class: Anti- tussive

Indications:

Treatment of symptoms of acute bronchitis and in colds of the respiratory tract with mucous secretion.

Available dosage form in the hospital:

-COUGH MIXTURE HERBAL ELIXIR (BRONCHICUM N)

Dosage:

Adolescents and adults:

Single dose: 7.5 ml 4 times daily

Daily dose: 30 ml

Common side effect:

Hypersensitivity reactions may occur, such as cutaneous rash or nettle rash (exanthema, urticaria) as well as swellings in the face, the mouth and/or the throat (Quincke's edema) associated with shortness of breath (dyspnea).

Pregnancy Risk Factor:

The wide use of thyme as medicine or as food has not yielded any signs that would involve a risk for pregnancy. Specific results from investigations into thyme and primula root during pregnancy are not available. Therefore, the use of bronchicum in pregnant women is not recommended.
