

CARDIOPLEGIC PERFUSION SOLUTION

Indications: Solution is indicated for perfusion and flushing of donor kidneys, liver, and heart prior to removal from the donor or immediately after removal from the donor. The solution is left in the organ vasculature during hypothermic storage and transportation (not for continuous perfusion) to the recipient

INSTRUCTIONS FOR USE (Recommendations):

Required Equipment: Perfusion apparatus with a Y-piece for bottle or bags

Perfusion cannula tube 2.5 to 3 mm

Tube clamp

Perfusion stand with a height setting of up to 200 cm with tape measure.

Cooling Equipment (5 to 8° C) for use in cardiac surgery

Perfusion tube with an internal diameter of 6 mm

Transport Container with sterile pouch for transport of the cooled organ from donor to recipient.

Filtration of CUSTODIOL is not necessary or recommended

Available dosage form in the hospital: CUSTODIOL 2000ML

Common side effect: No side effects have been encountered that could be attributed to this product
