Course Description	
The component aims to give the student an overall view of the role and work of the Occupational therapist and the OT department. The students will become more aware of the role and contribution of the other professions in the treatment team, and it is hoped to instill in the students early on in the course of studies, a sense of belonging to, and participation in, the multidisciplinary team. The component will also enable the student to know the basics of dealing with emergencies, both in the department and elsewhere.
