### ABSTRACT

Risks in stakeholders' management has attracted more attention in construction industry and still lacking mitigation during crises like COVID-19. However, the Enterprise Risk Management (ERM) methodology has provided a critical review and analysis in such discipline. The research paper objective is to carry out the art of literature review and analysis of ERM to mitigate risks through stakeholders' management from the past studies. Twenty articles will be reviewed for addressing ERM benefits. The anticipated outcomes are to develop a framework to identify the research objective. The findings will be important to highlight the strength and weaknesses of risk response for stakeholders in construction industry during crises.

**Keywords:** Construction Risk Management; ERM; Stakeholders Management.
